- B. Triage of war casualties

The physician should be able to demonstrate the understanding of :

- C. Ethics of combat casualty care
- D. Code of conduct in the combat environment

UNIT III The physician should be able to demonstrate the knowledge of:

- A. Chemical Warfare agents and injuries
- B. Thermonuclear weapons and injuries
- C. Biologic warfare agents and injuries
- D. Medical effects of radiation

UNIT IV The physician should be able to demonstrate the knowledge of:

- A. Field laboratory procedures
- B. Field Xray procedures-**telemedicine**
- C. Field medical care (first response team)
- D. Training prior to deployment
- E. Returning casualties to duty

The physician should demonstrate the skill of:

- F. Communication with operational commanders

UNIT V The physician should be able to demonstrate the knowledge of:

- A. Febrile syndrome in third world countries
- B. Infectious disease prophylaxis
- C. Sanitation in the combat environment
- D. Immunizations

UNIT VI The physician should be able to demonstrate the knowledge of:

- A. Cold injury and hypothermia
- B. Heat related injuries

- C. Hypobarics and high altitude physiology
- D. Hyperbarics- compression and decompression illness and injuries

UNIT VII The physician should be able to demonstrate the knowledge of:

- A. Psychiatric disorders associated with trauma
- B. Stress in specific combat support units

The physician should be able to demonstrate the skill of:

- A. Prevention of stress reaction in combat

UNIT VIII The physician should be able to demonstrate the knowledge of:

- A. Lightning related injuries
- B. Drowning and near drowning
- C. Insect, marine animal stings and snake bite

UNIT IX The physician should be able to demonstrate the knowledge of:

- A. Assessment standards, retention standards**
- B. Medical profiling, sick slips**
- C. Medical boards and the physical disability system**
- D. TRICARE Prime, TRICARE Remote**

UNIT X The physician should be able to demonstrate the knowledge of:

- A. Global surveillance- predeployment, post deployment**
- B. Readiness processing**
- C. Immunization tracking**
- D. Put Prevention Into Practice (PPIP), HEAR**
- E. Disease management**
- F. Prevention training injuries**

UNIT XI The physician should be able to demonstrate the knowledge of:

- A. Performance evaluations**
- B. Career Management**
- C. TQM/CQI**
